UP TO 4 AT ONCE

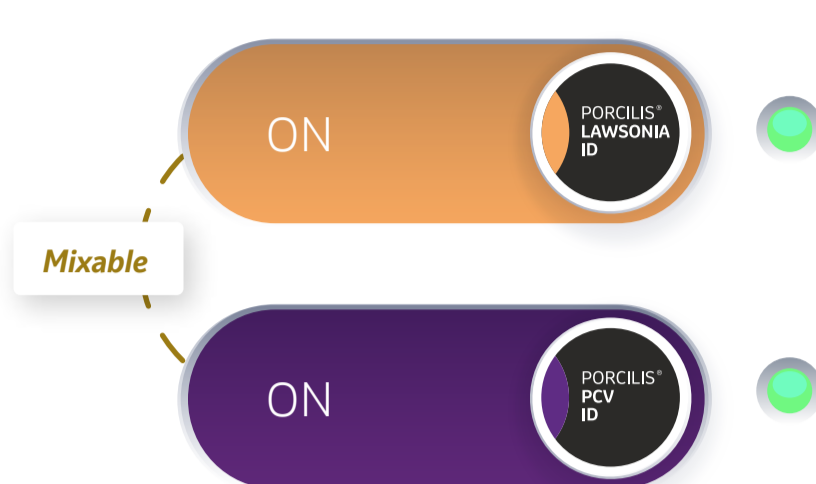

From 1 to 4 immunizations in just 1 administration

New approved combination of MSD Animal Health ID vaccines

Step 1

Mix Porcilis[®] Lawsonia ID with Porcilis[®] PCV ID

Step 2

Concurrently administer Step 1 mixed vaccines with either Porcilis[®] Mhyo ID ONCE or Porcilis[®] PRRS, in a device such as IDAL 3G+ Twin.

Step 3

Then, simultaneously administer the excluded vaccine from Step 2 with another IDAL 3G+ Mono.

The result

You can get a quadruple protection at the same time.

The simultaneous administration of these 4 ID vaccines will offer many benefits, including:

Flexibility

Broadest portfolio of ID vaccines

Convenience

Fewer times handling piglets means a simplified process and consequently more convenience.

Improved Animal and Human Health and Welfare!

Fewer injections means less stress for the piglets and a significant benefit for the worker.

Efficacy (both onset- and duration of immunity) of associated use was demonstrated in laboratory trials¹ and safety was evaluated under field conditions.

Note: Efficacy (both onset- and duration of immunity) of associated use was demonstrated in laboratory trials¹ and safety was evaluated under field conditions.
